## Best experience

The most important highlight of the game is to **watch the girls dancing in the stage 3 and 7 in free mode!**

Lovely and sexy girls, varying dance styles, dynamic dance music, ambient lighting flashing to the rhythm of the dance music.

Together they create a nightclub atmosphere. This is the core experience this the game will bring to players!

When the famous violinist Lindsey Stirling played her violin in the New York subway, no one passing had stopped. However it's not because the audience couldn't understand the music! Rather, it's because beautiful musics needs a bit of foil. Energetic beautiful girls, brisk dance moves, good expressions, warm and quiet environment, These all greatly enhance the experience of listening to music!

The dance moves used in the game are generated by capturing real girls' motion while they are dancing some of the world's most popular dance moves, and the animation itself is top quality! However, if there isn't any foils, the experience will not be good.

For the best experience, keep the following in mind:

- 1. Graphics card should be Nvidia GTX970 or better;
- 2. Display: Monitor needs to have a resolution of 1920\*1080 or higher, supports sRGB or better, and is 23 inches or larger. Curved monitors are even better;
- 3. Run the game in full screen mode;
- 4. The environment should be dim and quiet;
- 5. Bose QC20 noise canceling headphones or better;
- 6. The game volume must be large enough;

I want to refund my time. This game is great but needs a posing tool with clothing options for dressing\undressing girls.. it was fun until the 8th girl which is a DLC. and like you have read before sorry, you sexual attack a woman and then undress her against her will then\undress her.. Honestly i don't even know where to begin, this game is truly a gem compared to the RPG's and the indie games that steam is plagued with nowadays, It has a story that sucks you right in and makes you feel a variety of emotions. The artwork is absolutely stunning and i believe the audio is very accurate. the physics engine is absolutely perfect and true to life. The DLC was absolutely amazing and added to what i thought was an already perfect story.i can spend hours playing this visual masterpiece of a game that is truly a work of art. The game is also very helpful at training E-sports professionals (such as myself) with their aim. Overall this game is a suitable replacement for a real girlfriend and the gaping hole in my heart.

Overall nice tiddies 10/10. I should say something about how bizarre the last stage is and how the caption is \u2665\u2665\u2665\u2665ed. Is it kind of rapey? Yea. Does this game objectify women? You betcha. However, this game relies heavily on Achievement Completion. I've never really had such an urge to 100% a game since Modern Warfare 2. One by one, I got all three stars on each stage. My patience was tested when I had to sit through all seven stages in free play to get all the other achievements. I would be lying if I said I didn't think of exiting out. But I stood tall, and at the end of this grueling process, became triumphant. Finally, after finding out how to download stage 8, I endured through the whole stage knowing the achievement was within reach. After what had felt like months using the love egg, I knew I finally beat the game. For what this game is, I cannot recommend it enough. The price is fair, and it gives the player a sense of achievement after completing it, sort of like Banjo Kazooie or Mario Odyssey. This game emits a sense of nostalgia, and brings back a time where video games weren't just an annual shooter or another lazy battle royale. It's a much needed refreshment and I can see this game becoming the next big thing. And for what it's worth, the tiddie physics is 10/10.. If you're someone who looks for anime-styled game that's also somehow lewd but is overall nicely made then turn your backs and go away because this game's not like this. You're better off buying "AKIBA'S TRIP" or any of the "Nekopara" games than this.

However, if you're someone who enjoys things like anime called "I Want You To Make a Disgusted Face and Show Me Your Underwear" and just want something to fap to, then this might be something for you.

#### **The good things about this game:**

- **Normal stages are matching game's description perfectly and there's literally nothing more than that so you know what to expect.**
- **The anime aesthetics aren't bad.**
- **The moves of the dancers actually vary by stage. It isn't really noticeable when you're busy spraying them in normal mode tho.**
- **Achievements are easy to unlock. Normal levels are very easy and other half of the achievements just requires you to play the free mode until it ends.**
- **The cards are rather cheap so they're nice level booster, if you care about that.****The bad things:**
  - **You are in some kind of club, surrounded by unfinished, completely black models of what appears to be hairless and naked girls that know just one dance move. It's just creepy, especially once guards get added later on as they have normal models and the contrast between them and the club's visitors is just unsettling.**

- 
- The free mode you unlock after getting 3 stars on all stages doesn't let you change water-gun liquid, which means that you can't use color-removing water on the first girl (who's also the best girl) or use the milk on girls from stages 2-7.
  - The mentioned color-removing liquid you get for some reason can't remove color of the panties.
  - The lack of liquid selection isn't the free mode's only problem. It ends once the girl's done dancing.
  - The girls aren't facing you in the free mode and their angle changes over time so you can't just sit down and watch, you need to move around if you want the best views which might be a bit annoying if one of your hands is already busy.
  - All girls have the same body type. They aren't awful, even if their breasts look a bit too squished, but some variety would be nice.
  - Neither the badges, nor the wallpapers or emotes are actually nice looking and are basically cards-crystal fodder.
  - The 8th stage you get from free dlc involves you drugging and kidnapping a girl just to nut in her but for whatever reason the actual sex scene happens offscreen. In the stage, you're just using the egg to make her wet, there are 2 more arts shown that indicate that you're removing her lingerie and that's about it. You can't even use the other sex-toy that's shown in the top right. Clearly a scam. There are some recent news about how the dev wants to add something to the 8th stage but we'll see about that. For now, it's nothing special.
  - The pink haired girl who's acting your guide is shown in lingerie later on, saying that you're about to have some feast but that never happens. Even bigger disappointment than the 8th stage. Overall, I'd only recommend buying this game if it's on discount. 1 Euro is a bit too much for what this game has to offer.. best game out must buy

I CAN'T Control my HAAAAANDDDDD!!!!!!

I rate this game 69/69. This game I recommend to all friends to beat this game without using hand on mouse. Use only foot to handle mouse.

LOOOOOOOOOOOOOOOOOOOLLLLLLLL!!!!!! Definitely recommended, one of the best FPS game out there. The main game is mostly suggestive but the free DLC is fully adult only which is quite nice. It's very nice for cheap, especially when I got this for 50 cents. Finished it and card farmed it in about a half hour or so, or whatever it says I played this game for when I post this review. Oh yeah and I finished the whole game with the Steam controller too, haha.. pretty fun time waster, dance moves a fluid, stage 8 was hot. And also funny XD (my god people drawings dont have feelings calm down sjws). best 59 cents i spent in my life. Well... Why did I buy it? and ... why did I like it?

I just know it was worth it.. its nerf or nothin
